

Hands-on Exercise No. 4

UI/UX & Web Flow

Course: UI/UX & Web Flow	Total Marks: 10
Exercise: Hands-on No. 4	Due Date: 25/06/2026
Batch: DigiSkills 3.0 Batch-03	Format: .docx (MS Word)

Problem Statement

You are a UX Designer working on a Gaming E-Commerce Store in Pakistan. Users face this problem:

"Gamers struggle to find authentic and newly released gaming equipment easily and confidently."

My goal is to design a homepage that is Simple, Clear, Stress-free, and Trustworthy.

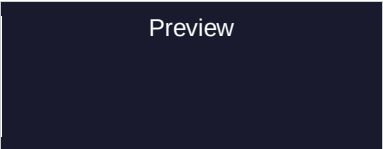

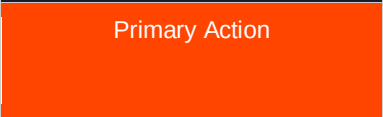

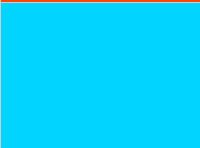

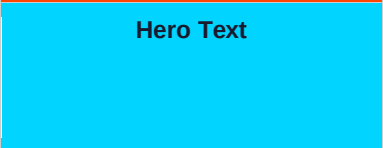

My Approach & Design Decisions

I designed a Gaming E-Commerce homepage for Pakistani gamers with the following approach:

- Dark theme with bold accent colors to match gaming culture and aesthetics
- Clear navigation bar with 4 main links: Home, Products, Sale, Contact
- Prominent search bar placed at the top for instant product discovery
- Featured Products section with large cards showing price, category, and Add to Cart
- Sale/Discount section clearly highlighting savings with strike-through original prices
- Trust badges (Authentic, Fast Delivery, Secure Payment, Easy Returns) to build confidence
- Consistent style guide applied throughout: same fonts, colors, and spacing
- Large clickable/tappable areas on all buttons and product cards

Style Guide

Color Palette

	Navy Dark #1A1A2E	Usage: Navbar, Hero Background	 Preview
	Electric Red #FF4500	Usage: Buttons, Accents, CTA	 Primary Action
	Cyan Blue #00D4FF	Usage: Hero Headlines, Highlights	 Hero Text
	Sale Gold #FFD700	Usage: Sale Tags, Promotions	 SALE!
	Success Green #00C853	Usage: Sale Prices, In Stock badges	 Rs. 8,999

Typography

Element	Font	Size	Weight
Page Title / Hero	Arial	36pt	Bold
Section Headings	Arial	24pt	Bold
Product Name	Arial	16pt	Semi-Bold
Price / CTA Button	Arial	20pt	Bold
Body / Description	Arial	12pt	Regular

Edge Cases — Design Beyond the Happy Path

Good UX design handles failure states, not just the perfect user flow. Here are the edge cases I designed for:

Edge Case	Problem	My Design Solution
☐ No Search Results	User searches for unavailable product	Show: "No results found — Try: Controller, Headset, Mouse" with suggestions
☐ Out of Stock	Product is unavailable	Show: "Out of Stock" badge + "Notify Me" button for restock alerts
☐ Slow Internet	Images fail to load on slow connection	Placeholder skeleton/loading cards shown — text and price still visible
☐ Empty Cart	User opens cart with nothing added	Show friendly message: "Your cart is empty!" + "Browse Products" button
☐ Mobile View	Small screen — cramped layout	Hamburger menu replaces navbar. Products shown 2-per-row. Large tap areas.
☐ Payment Fail	Payment does not go through	Clear error: "Payment failed. Please try again or use COD." Cart items saved.

Consistency Checklist

- Same font (Arial) used throughout all sections ✓
- Color palette applied consistently — navbar, buttons, prices all follow style guide ✓
- All CTA buttons have the same style: Electric Red (#FF4500), bold white text ✓
- Spacing between sections is uniform and scannable ✓
- Icons and emojis used consistently to aid quick recognition ✓
- Large clickable/tappable areas on all cards and buttons ✓
- Trust badges present to build user confidence ✓
- Search bar is prominent and placed at top for instant access ✓
